Mobile App Developer
£30-50K Salary
Part OR Full Time Position
Upto full time (4 day week)

Would you like to join an established micro digital marketing studio in the heart of Norwich working with well-known brands? We're looking to recruit an exceptional individual to help grow our business. If you are an enthusiastic, passionate and flexible individual who has a drive to learn, then carry on reading...

How to Apply

Applying is simple: we would like to see your full CV (with a minimum of 2 years career history) and a short description as to why you would like to work with Hyper Pixel.

If you have a portfolio of work, or have created a home-made mobile app: we would love to see this too.

Once you have all that, email us on careers@hyperpixel.co.uk

Closing date:
10th August 2019

The business:

Hyper Pixel Ltd is a small and independant mobile focused marketing studio, specialising on mobile and app technology. By creating extraordinary mobile experiences and engaging apps for businesses of all sizes, we open new revenue channels, connect clients with new customers and grow brands online.

The role:

We are on the hunt for an exceptional individual who is looking for a challenge, working autonomy and high reward. As a mobile app developer: you will be responsible for developing digital mobile products produced in both the Flutter Dart SDK and iOS / Android native languages. Your weekly routine will consist of new app development; implementing device specific functionality; providing support and technical assistance to existing clients; and undertaking scheduled maintenance of app based projects.

The role will also branch out into web technologies: integrating mobile data feeds and RESTful APIs.

As part of a micro team, you will work alongside the director and will be instrumental in helping to shape the businesses procedures; improving code development and helping the business grow.

The right candidate will need to work autonomously, but will have freedom to do so over a 4 day working week.

You will need to have:

- a passion for mobile, Android and iOS technologies
- the drive and determination to learn new topics as they are released onto the market.
- the resilience to continually critique and challenge ones self
- ability to realistically deliver workloads and work independently
- ability to make informed technical decisions on behalf of the company and our clients
- a portfolio of past B2B or B2C projects you have worked on

Your commercial experience to date will also need to demonstrate excellent working knowledge of:

- Mobile app development (iOS/Android SDK)
- Flutter SDK (desired but not essential)
- HTML, CSS
- JSON, XML
- PHP (desired but not essential)
- Mac OSX

Your role will include:

- native and Flutter app development
- making existing applications compatible with new technology
- fixing technical problems
- changing applications according to new specifications
- implementing security measures
- HTML and CSS development
- traveling to events and seminars
- attend meetings and workshops

We would like to see a person who:

- is patient and calm under pressure
- can think on their feet but also follow protocol and procedure
- is reliable and trustworthy
- enjoys a good challenge
- can work autonomously and wants workplace flexibility
- takes great satisfaction crafting beautiful mobile apps
- exercises humility and positivity (we want to be happy at work!)

What you'll get:

- flexible working week (4 days work / 3 days off)
- A competitive salary
- a performance related pay review every 12 months
- 20 days holiday
- 8 bank holidays off per year
- work autonomy and flexibility
- personal/professional development
